

MICHAEL KAO

SOFTWARE DEVELOPER | Full Stack Web Development, AI API Integration

Riverdale, United States Email: michaelkao1998@gmail.com phone: +17083920847

PROFESSIONAL SUMMARY

- **Work Experience:** +7 years of Experience and Built and maintained full-stack software solutions across backend, web, and mobile environments, with hands-on experience in Laravel, Next.js, backend architecture, API development, and AI-driven application features. Applied AI agents and large language models to support automation workflows, improve developer productivity, and enhance application intelligence, contributing to more scalable and efficient product delivery.
- **Professional Skills:** Strong foundation in backend system design, mobile development, full-stack implementation, and modern AI application development. Able to translate product requirements into maintainable technical solutions, integrate LLM-based capabilities into software systems, and optimize development practices to improve workflow efficiency by 5%.
- **Professional Attitude:** Committed to continuous learning, practical innovation, and reliable engineering delivery. Focused on building scalable, user-oriented technology solutions through structured problem-solving, cross-functional collaboration, and disciplined execution.

CORE TECHNICAL EXPERTISE

Frontend: React, Next.js, TypeScript, JavaScript, Vue/Nuxt, Angular, Tailwind CSS, responsive UI
Backend: Node.js, Express.js, Python, PHP, Laravel, REST APIs
E-commerce: WordPress, Shopify.
Data & Cloud: PostgreSQL, MySQL, MongoDB, Docker, Vercel, AWS, Cloudflare
AI: AI Chatbot, AI agent, RAG, AI API Integration

SELECTED PROJECT EXPERIENCE

Go Beyond Clicks | *SaaS landing page with responsive design, hero, features, pricing,FAQ and footer.*

<https://next-saas-lp.vercel.app/>

- Designed as the public-facing website for SaaS product to try purchase the service.
- Supported the responsive interfaces, reusable UI sections, animations, pricing layouts, interactive animations.
- Placing the AI analyze section and Connected to AI API for analyzing uploaded documents

Team Simplee / *Warehouse, fulfilment and logistics portal*

<https://team-simplee.vercel.app/>

- Built a client portal for real-time visibility into inbound goods, storage, inventory, order status, dispatch, returns, and operational KPIs.
- Created workflow views for stock movements, discrepancies, fulfilment activity, customer-service follow-up, and performance reporting.
- Connected operational data and APIs to support eCommerce channels, courier workflows, and a responsive dashboard experience.

AME DAC / *Enterprise workflow application*

<https://app.ame-dac.com/>

- Built a secure business application for an established UK electrical contractor, replacing fragmented manual processes with structured digital workflows.
- Implemented authenticated dashboards, custom forms, job and customer records, document handling, and operational reporting for office and field users.
- Designed maintainable backend and data flows so new modules, roles, and business rules can be added without rebuilding the platform.

Goodiset / *eCommerce platform for UAE and GCC retail*

<https://goodiset.com/>

- Developed a mobile-first shopping experience for a multilingual product catalogue spanning Pick & Mix, gift boxes, gift cards, subscriptions, and corporate orders.
- Implemented product, customer, payment, and order-management workflows with a clear path from discovery through checkout and post-purchase account activity.
- Supported scalable merchandising and content through category pages, product detail views, promotions, and SEO-oriented editorial content.

Chauncey All Pro / *Lead capture and customer communications platform*

<https://chaunceyallpro.com/>

- Built customer-facing service journeys and a companion business platform for quote capture, contact management, campaigns, and follow-up activity.
- Implemented project inquiry forms, SMS subscription flows, dashboard modules, and verified toll-free messaging integration to support customer engagement.
- Added responsive content, analytics, and marketing integrations across service pages, project proof, local coverage, and conversion-focused calls to action.

Knowbase AI / *RAG / business knowledge-base SaaS*

<https://knowbase-ai.netlify.app/>

- Multi-tenant knowledge-management application creating workspaces, upload documents, add URLs or manually created knowledge sources.
- Interactive with an AI assistant that answers questions using the organization's stored information.

- RAG-style workflow: instead of relying only on the model's general knowledge, the system is designed around company-specific information that can be supplied through documents and other knowledge sources.

EXPERIENCE

Junior Back End Developer

Wynex • Kuala Lumpur

03/09/2020 - 05/01/2022

- *Developed backend services using Express.js, Next.js*
- *Designed and implemented RESTful APIs to support frontend applications and business workflows and troubleshooting*

Senior Full Stack Developer

Forthify • Kuala Lumpur

06/20/2022 - 10/30/2023

- *Optimized SQL queries and database structures to improve application performance and reliability.*
- *Built reusable backend components and integrated third-party services into enterprise systems.*

Freelance Software Engineer

Self-Employed | Remote • Riverdale

- *Built RESTful APIs and backend services to support scalable applications.*
- *Developed mobile applications and integrated third-party services.*
- *Leveraged AI tools and LLM-based technologies to improve development workflows and automate business processes.*
- *Collaborated with clients to gather requirements, deliver solutions, and provide ongoing technical support.*

DELIVERY STRENGTHS

End-to-end ownership: Requirements, UX, architecture, implementation, testing, deployment, and iteration.

Production discipline: Secure authentication, role-aware access, validation, error handling, maintainable APIs, and documentation.

Client collaboration: Clear progress updates, practical technical guidance, and dependable post-launch support.

EDUCATION

BSc, Computer Science | Curtin University Malaysia
